**TEXAS  
PEDESTRIAN  
SAFETY  
COALITION**

## Resource Sections in this document

- State Highway Safety Plan Pedestrian Emphasis Area Update
- FY22 Webinar Series Topic Suggestions
- Important Meeting Links
- Chat Transcript

## Welcome & Introductions

Mike Manser provided a welcome and asked everyone drop their name in the chat, who attended.

## FY22 Grant Year Overview

An overview of the planned grant year was presented by Mike and asked for everyone to think of ideas for webinars and presentations. The topics submitted were captured in the chat of our meeting, those details are captured below in the Chat Transcript.

- Outreach Plan submitted
- Coordinate and provide support to the Texas Pedestrian Safety Coalition
- Conduct 3 coalition meetings
- Conduct 3 webinars
- Conduct FY22 Pedestrian Safety Forum
  - Date of Forum is Thursday, August 4, 2022
  - Format
  - In-person, hybrid, virtual only
  - Topics of interest

## State Highway Safety Plan Pedestrian Emphasis Area Update

Melissa Walden provided an update on the Texas State Highway Safety Plan with regards to the Pedestrian Emphasis Area of the plan.

### **SHSP Overview, Requirements & Process**

- EA Team Representation – Diverse stakeholders from public and private sectors, including local, regional, state and national levels.
- Mission – Bring forward countermeasures to translate plan into action.
- Requirements
  - Data-driven problem identification
  - Performance-based
  - Evidence based strategies & countermeasures
  - Five-year updates
  - Regular evaluation
- Five-year update, data driven, proven effective countermeasures, numerous process requirements

# TEXAS PEDESTRIAN SAFETY COALITION

- Structure
  - Executive Committee has met once to approve emphasis areas
  - Management Team (TXDOT, TTI, FWHA) – takes care of the process requirements. Does research to show what is working in other places, pull additional requested data, etc.
  - Emphasis Area (EA) Team – responsible for EA content, reviews crash data and countermeasures, creates action plan for each countermeasure
- SHSP Emphasis Areas (new EA are marked with an asterisk\*)
  - Prevent Crashes
    - Roadway and lane departures
    - Pedestrian Safety
    - Intersection Safety
    - Impaired Driving
    - Distracted Driving
    - Older Road Users
  - Reduce Severity
    - Occupant Protection \*
    - Speeding
    - Roadway and lane departures
    - Intersection Safety
  - Enhance Emergency Response
    - Traffic management\*
    - Crash responses\*
  - Include younger road users in all applicable EA\*

## **Pedestrian Analytics**

- 714 fatalities
- 1,154 suspected serious injuries in 2020
- Association with other Emphasis Areas
  - 24% intersections
  - 11% older users
  - 82% impairment
  - 13% distraction by driver
  - 65% (6,088) crashes occurred in dark lighting conditions

## **Strategy & Action (Double Down on What Works)**

- We should focus where we can make a difference
- Forthcoming survey to collect feedback on how EA Team members feel about the current 2017 Strategies. Respondents will have the opportunity to indicate whether they believe each countermeasure should remain, be modified, or be discarded.
- There are a number of current countermeasures that the SHSP team cannot confirm are currently being addressed by any organizations or initiatives.
- The website is a helpful resource: [TexasSHSP.com](http://TexasSHSP.com)
- Next meeting – present results of survey and research of best practices

## **Coalition Feedback**

- In the Texas SHSP, what should the priorities be regarding pedestrians – infrastructure and/or behavioral?
- How should these priorities be deployed – statewide and/or locally?
- Should the TPSC serve as the Emphasis Area Team?
- As members of the TPSC, would you provide feedback on strategies & countermeasures through a survey?

## FY22 Webinar Series Topic Suggestions

Ben Ettelman facilitated a discussion to help prioritize webinar topics for the grant year. The following topics were voted on and will be used to develop upcoming webinars during through September.

- Crash modification factors, metrics associated with pedestrian safety activities
- Innovative engineering countermeasures
- Policy initiatives to improve pedestrian safety
- Funding needs to support pedestrian safety
- Pedestrian safety for children/Safe Routes to School
- Collaborative development agreements to improve pedestrian infrastructure
- Alcohol involvement in pedestrian serious injuries and fatalities
- Pedestrian safety law awareness
- Complete Streets
- Equity in Transportation
- Adopting and implementing Vision Zero programs

## Stakeholder Updates

Amelia Hayes with FHWA provided an update regarding new proven countermeasures being adopted by FHWA as well as a webinar that will be hosted Monday, November 22. [10:46 AM] Meyer, Joel Barbara Russell - I view those as one in the same. How to incorporate pedestrian safety into all projects like 1

[10:47 AM] Scott White Is there way we can build "funding" into recommendations for strategies - especially with our current funding models and priorities? The Texas Mobility Fund is an opportunity to invest in active transportation infrastructure and retrofits

[10:47 AM] Karla Weaver Maybe there is a way to look at spending/education spent in the 5 cities/areas on pedestrian safety... also the MPO's/regions the cities fall in? Need to probably look at design expectations and policies like 1

# TEXAS PEDESTRIAN SAFETY COALITION

[10:50 AM] Ramona Crayton has temporarily joined the chat.

[10:50 AM] Scott White I agree with John - Temporary Traffic Control Plans often leave out the needs of people who walk, bike, roll, or use transit like 2

[10:52 AM] Nina Saint (Guest) no longer has access to the chat.

[10:59 AM] Jay Blazek Crossley (Guest) Another new funding stream that similarly should not only be spent on car priorities is the new allocation of TERP funds diverted to CMAQ, about \$90 million a year, all of which could theoretically be spent on sidewalks. like 1

[11:01 AM] Meyer, Joel I have to hop off to another meeting, but thanks for hosting the meeting and proving these updates. Also, a shameless plug for some work we did around equity recently

[11:01 AM] drhandy has temporarily joined the chat.

[11:01 AM] Meyer, Joel (Guest) no longer has access to the chat.

[11:06 AM] Jay Blazek Crossley (Guest) Another key equity issue is lack of representation in the transportation decision-making system, especially at MPO Transportation Policy Councils. Sub-urban residents – who live in car-dependent places and might not see the value in investing in pedestrian infrastructure – are way over-represented in MPO decision making which results in spending too much on car infrastructure and not adequately addressing pedestrian needs. Also, lack of women in these decision making systems. An H-GAC survey found that women of the Houston region would broadly choose to spend more on sidewalks and safety than men. like 2
