About the Topic

The Active Transportation Plan Inventory is a map-based inventory of bicycle and pedestrian-related transportation plans published by planning entities at varying geographic levels across the state. It was created by TxDOT to assist planning entities, designers, engineers, and other planning professionals focused on active transportation with collaboration and coordination during project development by serving as a central repository of existing active transportation planning documents.

About the Coalition

The Texas Statewide Pedestrian Safety Coalition is a group of individuals and organizations concerned with pedestrian safety issues in Texas. The Texas Statewide Pedestrian Safety Coalition supports advocacy, education, and outreach around pedestrian safety in Texas.
